

Spring Boot REST API Tasks with ResponseEntity and Global Exception Handling

1. Online Book Store API

Database Table: books

Base URL: /books

API Endpoints
POST /books/add
GET /books
GET /books/{id}
PUT /books/update/{id}
PATCH /books/price/{id}
DELETE /books/delete/{id}

Model Fields: id, title, author, genre, price

Custom Exception: BookNotFoundException

Additional Requirements: Use ResponseEntity and Global Exception Handling using @RestControllerAdvice.

2. Student Registration API

Database Table: students

Base URL: /students

API Endpoints
POST /students/register
GET /students
GET /students/{id}
PUT /students/update/{id}
PATCH /students/email/{id}
DELETE /students/delete/{id}

Model Fields: id, name, course, email, mobile

Custom Exception: StudentNotFoundException

Additional Requirements: Use ResponseEntity and Global Exception Handling using @RestControllerAdvice.

3. Shopping Cart API

Database Table: cart_items

Base URL: /cart

API Endpoints
POST /cart/add
GET /cart
GET /cart/{id}
PUT /cart/update/{id}
PATCH /cart/quantity/{id}
DELETE /cart/delete/{id}

Model Fields: productId, productName, quantity, price, category

Custom Exception: CartItemNotFoundException

Additional Requirements: Use ResponseEntity and Global Exception Handling using @RestControllerAdvice.

4. Hospital Appointment API

Database Table: appointments

Base URL: /appointments

API Endpoints
POST /appointments/book
GET /appointments
GET /appointments/{id}
PUT /appointments/update/{id}
PATCH /appointments/time/{id}
DELETE /appointments/delete/{id}

Model Fields: appointmentId, patientName, doctorName, appointmentDate, appointmentTime

Custom Exception: AppointmentNotFoundException

Additional Requirements: Use ResponseEntity and Global Exception Handling using @RestControllerAdvice.

5. Food Delivery API

Database Table: orders

Base URL: /orders

API Endpoints
POST /orders/place
GET /orders
GET /orders/{id}
PUT /orders/update/{id}
PATCH /orders/address/{id}
DELETE /orders/delete/{id}

Model Fields: orderId, customerName, itemName, quantity, address

Custom Exception: OrderNotFoundException

Additional Requirements: Use ResponseEntity and Global Exception Handling using @RestControllerAdvice.
